New Initiatives Further Opportunity for International STEM Students, Scholars and Researchers, U.S. Entities

MEDIA NOTE

OFFICE OF THE SPOKESPERSON

JANUARY 21, 2022

Share 

Consistent with the recent **Joint Statement of Principles in Support of International Education**, the U.S. Department of State is proud to announce additional measures to further our support for increasing the flow of talent in science, technology, engineering and math (STEM) to benefit American communities.

The **Early Career STEM Research Initiative** seeks to connect **BridgeUSA** exchange sponsors with interested U.S.-based STEM host organizations (e.g., small and medium businesses) to increase the number of STEM-focused educational and cultural exchanges. The Department is also announcing an **extension for undergraduate and graduate students in STEM fields on the J-1 visa** that will facilitate additional academic training for periods of up to 36 months. The extension applies to the current (2021-22) and subsequent (2022-23) academic years.

International students, researchers, scholars, and exchange alumni contribute to the long-term economic health and competitiveness of the U.S. economy, contribute to U.S. leadership in

research and innovation, and advance our diplomacy and mutual understanding between nations. In 2020, international students contributed more than \$39 billion to our economy and supported an estimated 410,000 American jobs in cities and towns across our country. U.S. entities and businesses gain a competitive edge in our global economy with the perspectives and skillsets of international students and scholars, particularly in the STEM fields.

The Department is pleased to join the White House and interagency partners today in announcing these new actions as a continuation of our commitment to support increased economic prosperity and national security for the American people.

For more information on these new initiatives, please visit <https://j1visa.state.gov/>. Interested media should contact the Bureau of Educational and Cultural Affairs at eca-press@state.gov.
